

PROGRAM OVERVIEW

Falls from height are the leading cause of accidental death and injury in Ontario. Each day, 80 people are injured from falls at work. According to the WSIB, on average, each injury results in 4 weeks of lost time. The Safe-Tech Fall Protection Training Program is intended for any worker who may at times be required to work at heights where fall protection is required. This program provides workers with the required knowledge to prevent fall related accidents. Participants will be instructed how to select the proper fall protection components for their application and how to correctly use, inspect and maintain their fall protection equipment.

COMPLIANCE

The Occupational Health and Safety Act (OHSA), Reg. 851, section 85 states that; "Where a worker is exposed to the hazard of falling and the surface to which he or she might fall is more than three metres below the position where he or she is situated,

- a) the worker shall wear a serviceable safety belt or harness and lifeline adequately secured to a fixed support and so arranged that the worker cannot fall freely for a vertical distance of more than 1.5 metres; and
- b) the fall arresting system described in clause (a) shall,
- c) have sufficient capacity to absorb twice the energy and twice the load that under the circumstances of its use may be transmitted to it, and
- d) be equipped with a shock absorber or other devices to limit the maximum arresting force to 8.0 kilonewtons to the wearer.

PROGRAM INCLUDES

- Written examination
- Record of training report
- Individual wallet certificates
- Wall certificate for company

CLASSROOM TRAINING CONTENT

- Identification of fall hazards
- Equipment selection/Inspection
- Understanding anchorage points
- Fall protection systems and components
- Basic energy dissipation principles
- Calculating fall clearances
- Rescue plan importance
- Standards and regulations
- Body support: application/fitment
- Component inspection and maintenance

LANGUAGE COMPREHENSION

Safe-Tech programs are conducted in English and best suited for participants with good English comprehension. Please advise our office at the time of booking and prior to the start of the course of any comprehension concerns or if you will be providing a translator when warranted. The instructors will do their best to accommodate, however Safe-Tech cannot be held responsible for any situation where comprehension was a factor due to a language barrier or impediment.

DURATION & LOCATION

Four hour classroom program includes both a theory and hands-on segment and may be conducted on-site at your facility or at one of our off-site training locations in the GTA.

SAFE-TECH ADVANTAGES

Safe-Tech is the Working at Height and Equipment Training Partner of [Workplace Safety & Prevention Services](#) and this program is Ministry of the Environment Director approved (0.4 CEUs).

- Safe-Tech programs meet or exceed all pertinent standards and regulations.
- On-Site programs are offered on any shift, 24/7, without shift premiums.
- Our unique training techniques incorporate exclusive custom models and visual aids which enhance interest and facilitate higher comprehension & retention levels for all participants.
- Our internal data management and tracking system automatically notifies clients at least 30 days before personnel are due for applicable recertification.
- Safe-Tech is the first and only training company in the industry to offer a *satisfaction guarantee*. *“If the content or presentation of any Safe-Tech program is not to your complete satisfaction, there will be no charge”*.
