LEARNING MANAGEMENT SYSTEM (LMS)

Learning Management for Safety

As part of BIStainer's comprehensive suite of EHS software, you have access to an enterprise-level learning management system (LMS) that includes a robust exam engine, SCORM 1.2 and 2004 compatibility, an integrated eCommerce store, and a course permission management system. But what really sets BIStainer apart from traditional learning management systems is that BIStainer is designed for companies with strong safety training needs. Therefore, many of its supporting features strongly align with safety, making BIStainer a perfect fit for any company's safety requirements.

CONFINED SPACE

People who work in confined spaces should be aware of the risks and hazards involved within their work environments. Confined space awareness training makes workers aware of what to look for. This course not only increases the worker's awareness and teaches how to keep themselves safe, but also helps workers enhance the safety of others with whom they work with. Our Confined Space Awareness Online Training Program is built in accordance with the CSA standard 1006-001 for Management of Work in Confined Spaces.

ASBESTOS AWARENESS TRAINING

Asbestos is a known human carcinogen. Exposure to it can cause very serious health conditions that can lead to disability and, in some cases, death. Therefore, it is extremely important to monitor and reduce workers' exposure to asbestos. This course is designed to help learners understand the basics of asbestos and how to minimize exposure and keep themselves safe.
